

#461/#452-0-14

Marker Lights

Steady light is designed for designated anchorages. Operates 240 hours on 6v lantern battery. Visible 1/2 mile. 9.5"H. Stainless steel hardware. **Model #461** has waterproof manual On/Off switch. **Model #452** automatically turns on at dusk and off at dawn, and has On/Off switch override.

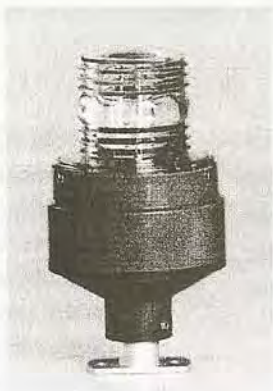

#561-60-15

Marker Light

Flashes 60 times per minute. Solid state electronic circuitry turns light on at dusk and off at dawn. Clear fresnel lens is standard (see notes for ordering). Operates 100 nights on 6v lantern battery. 9.5"H. Stainless steel hardware. **Model #556**
Dredge Marker Light is visible 2 miles and operates 10 nights on 6v lantern battery.

#314A
Strobe/Anchor Light

Get two lights in one— an emergency masthead 500,000 candlepower strobe, and a steady 360° white anchor light visible 2 miles. Compact and light (only 11 oz.) 12v electronic circuit is self-contained in waterproof case. 5.75"H x 4.5" dia.

Notes for Ordering Marker Lights

All **GUEST** Marker Lights carry a 3-number designation separated by hyphens. The first three digits represent the model. The second set describes the number of flashes per minute (ic, 0 is a steady light; 60 indicates one flash per second). The third pair of numbers designates the color of the fresnel lens:

- 14- clear
- 15- amber
- 16- blue
- 17- red
- 18- green

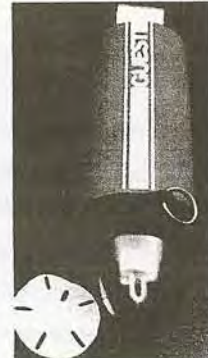

#375
Deluxe Incandescent

Two heavy-duty lantern batteries provide more power and 48 hours of continuous brilliant flashes. 13" long. Includes #C21200 bracket. SOLAS approved. USCG app. #161.010/9/0.

#326A
Xenon Strobe

Automatic water activation produces a continuous 36 hour flash. Unbreakable lens, rugged molded case, threaded O-ring seal & completely encapsulated space-age solid state flash circuit. SOLAS approved. USCG app. #161.010/4/1.

#301A
Xenon Strobe

Automatic water activation produces a continuous 48 hour flashing strobe visible for miles. Case has threaded top with O-ring seal for water-tightness. Mounts easily in life ring with stainless steel bracket. 12" long.

#371
Hi-Power Incandescent

Advanced solid-state circuitry flashes a brilliant incandescent light continuously for 48 hours. Automatic water activation. Watertight threaded top has O-ring seal. Mounts easily in life ring with stainless steel bracket.

#378C
Personal Safety Light

Steady light operates up to 10 hours continuously. Compact size. Sturdy braided lanyard for easy attachment. Uses 9v alkaline battery. USCG approval #161.012/6/0. Optional mounting strap #P-16704.

#378A
Flashing Personal Safety Light

Exceptionally brilliant incandescent light flashes continuously for up to 32 hours. Compact for easy attachment to PFD or belt. Lanyard & whistle included. 2.5 oz. 5" long. USCG app. #161.012/4/0.
